

POWERplus[®]

**PORTABLE
SOLAR CHARGER
2 x USB 5V OUTPUT**

CAMEL

POWERplus® Camel

Portable Solar Charger

2x USB 5V output

Another handy product from POWERplus, the Camel. The Camel is a 3W solar cell with an effective output of 2W which can charge your mobile phone and other mobile USB chargeable devices directly using the sun.

Simply place the panel towards the sun and connect your mobile device with the USB cable supplied with your mobile device at one of the 2 USB out ports of the Camel. Now you are ready to charge.

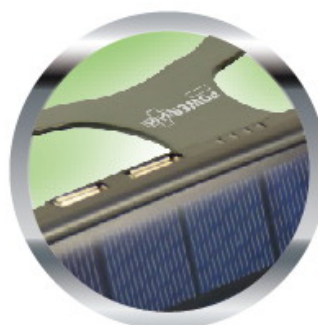

Do you want to turn your powerbank into a solar powered powerbank? Use the Camel for this job. Simply connect the powerbank with one of the 2 USB out ports and charge your powerbank. With the Camel you can create your own small (emergency) energy supply. For example an off-grid lighting system with additional powerbank and USB light(s).

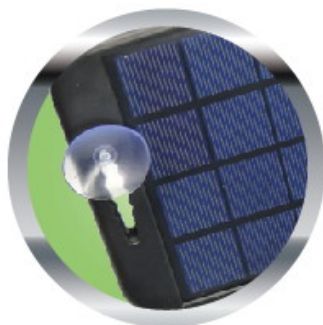

Charging mobile phone

Charging powerbanks

2 x USB 5V output

Including 2 suction cups for attaching on windows

Charging 2 devices at the same time
