## POWERBANK WITH DISPLAY

5W Solar Panel – Replaceable 18650 Lithium Cells

The POWERplus Crocodile is a powerful portable solar / USB powered powerbank with replaceable batteries.

Normally the lifetime of a powerbank is limited by the internal battery. This powerbank works with replaceable 18650 Li-Ion rechargeable batteries which can be bought in the aftermarket and after lifetime of the batteries, you can simply buy new batteries without throwing away the powerbank. Besides this, this system makes it much easier to recycle batteries and powerbank after lifetime.

The Crocodile works with an external solar cell rated 5W which can provide an effective output of 3,5W in sunny outdoor conditions.

The powerbank and solar cell can be stored in a neoprene protective pouch, which also can act as a stand for the solar cell to optimise the charging angle towards the sun, which improves the charging performance of the solar cell.

Thanks to the separate components and replaceable batteries the Crocodile is the most ecofriendly solar powerbank on the market.

Unique triple charging input:  
micro USB - lightning - type C USB

Neoprene pouch/stand with outer storage space for powerbank

Double USB output 2A and 1A

Display showing battery status,  
charging port, charging current

Replaceable 18650 Lithium batteries;  
most ecofriendly powerbank

Lightweight 5W solar cell  
Effective output 3,5W

- 4 x 18650 Lithium Ion 18650 batteries 10.400 mAh / 38 Wh
- Overcharge/discharging protection
- Reverse polarity protection
- Zero voltage / high voltage output protection
- Intelligent: detects optimal charging current
- Maximum input: 0.45A per port / 1.8A max.
- Total charging output current 2.2A.  
2.2A max port 1 and 1.5A max. port 2
