

WATER POWERED FM SCAN SHOWER RADIO

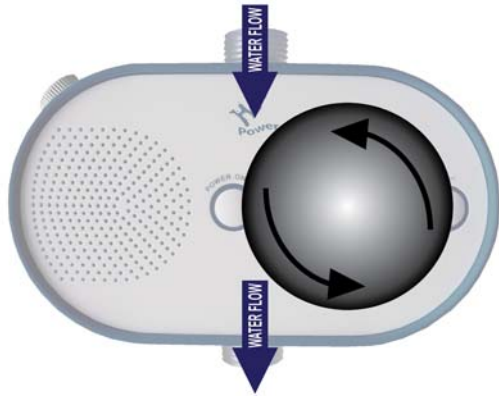

SHOWERRADIO

Water Pressure Powered SHOWER RADIO

H2O™ introduces the worlds first water pressure powered shower radio.

This elegantly designed radio can be fitted directly on the faucet of your shower. By turning on the water, the water flow will power the integrated turbine generator which creates energy for the clear sound and excellent reception of this radio..

Now you can enjoy music, news, information, whatever you choose while showering – all of this using free energy.

The H2O™ Shower Radio has a very efficient patented turbine generator at the heart of its technology. This coupled with the built-in rechargeable battery, allows energy to be stored as well as playing the radio enabling it to continue to play after the shower is turned off.

The last station and volume level are automatically stored after use ready for your next shower! Simple to fit – no tools required – can be installed by anyone in a matter of a few minutes.

The H2O™ shower radio is a patented innovative product which uses the latest technology of miniature water turbines to create free energy.

EU Patent no. 1037472
US, China and South Korea patents pending
UK Design Registration pending

Save on batteries and contribute to a better environment by reducing your carbon footprint today with the H2O™ Shower Radio

Technical details:

Radio	
FM sensitivity	more than 15uV
FM receipt range	87,5 - 108 MHz
Audio Output Power	more than 80mW
Generator	
Output when water pressure at 0.16 Mpa/23PSI/1.6 BAR flux > 260L/hr	Voltage: > 2.4V Current: > 60 mA
Output when water pressure at 0.20 Mpa/29PSI/2.0 BAR flux > 300L/hr	Voltage: > 2.8V Current: > 70 mA
Output when water pressure at 0.25 Mpa/36PSI/2.5 BAR flux > 380L/hr	Voltage: > 3.5V Current: > 80 mA
Size & Weight	
Size	131*74.5*42.5 mm
Weight	272 gram

H2O™ - The Original Water Power
